**Description: Copolymer of Acrylic Acid**

NorthQuest 5420 is acrylic/sulfonic copolymer manufactured to offer the same performance benefits of Northquest 2000 in a concentrated, powder form. It finds wide use in industrial water treatment programs as a zinc/Fe stabilizer & a superior dispersant of organic & inorganic particulates over acrylic homopolymers. It formulates readily with various dry additives including phosphonates & inorganics to furnish a complete line of industrial water treatment products that are not only more economical, but can save ware-housing space & lower handling risk over their liquid counterparts.
